

Colombes – March 16<sup>th</sup>, 2017

## European Coatings Show 2017, Nuremberg: Design solutions that make our lives better

For the upcoming European Coatings Show, we are launching advanced acrylate and methacrylate solutions, developed to meet both current and future challenges. From top quality finish to extreme durability UV LED EB curable coatings and inks, you will be able to appreciate how our products contribute to the improvement of our living standards and environment thanks to sustainable and compliant systems. You can discover our show program, from today, on [emea.sartomer.com](http://emea.sartomer.com). We will be pleased to welcome you on Arkema booth #313 (Hall 4A) from April 4<sup>th</sup> to 6<sup>th</sup>, 2017 in Nuremberg.

### UV LED EB curable high performance coatings and inks

We will invite you to discover our latest advances to

- Address extreme conditions with a selection of our unique oligomers for high performance and durability UV curable hardcoats
- Achieve superior adhesion properties on rigid and flexible plastic substrates through the launch of PRO22019, our new adhesion promoting oligomer
- Deliver top quality finish films with the introduction of our new PRO21536, unique urethane silicone acrylate
- Meet the most stringent regulations and directives with a dedicated product offering for food packaging applications

A brand new brochure, highlighting the best of our expertise towards printing inks market drivers, will be released during the show.

### 3D printing

As a pioneer in the design of UV curable systems for 3D printing, we will highlight our new generation of solutions for additive manufacturing, marketed under our new brand N3xtDimension™.

BY ARKEMA

### Peroxide and amine cure (meth)acrylate systems

We will present our selection of low VOC, friendly labelled solutions for construction chemicals, flooring and waterproofing systems. You will be able to learn more about CN1993, our new unique urethane dimethacrylate, designed for better control cure kinetics, flexibility and adhesion of your systems.

### REACH 2018

In preparation for the 2018 REACH deadline, we have especially designed a friendly user flyer to help you in the understanding and anticipation of this major step in the chemical industry.

We look forward to meeting you at the upcoming ECS, April 4<sup>th</sup> to 6<sup>th</sup> 2017 in Nuremberg, GERMANY, on Arkema booth#313, Hall 4A.

### More about Sartomer

Sartomer, subsidiary of Arkema Group, is a premier global supplier of specialty acrylates and methacrylates, designed for ultraviolet, light emitting diode and electron beam (UV/LED/EB), peroxide and two-part epoxy/amine curable systems. As a pioneer in the design of solutions that provide very high quality 3D printed materials, coatings, inks and adhesives, our products are highly contributing to the improvement of our daily life standards, from automotive, house, consumer electronics, construction to cosmetic applications. Committed to drive the technology forward, we strive to continuously offer new materials and solutions which will provide a lasting benefit for our lives and environment.
